

4th Grade News

We hope everyone had a fantastic MEA Break. We are almost back to a normal week of school. We were able to get in every subject and even an English Unit test. We finished the unit by learning the difference between common and proper nouns. We used our knowledge of these nouns to create posters. They are quite colorful.

In Math, We finished out unit on perimeter and area. We walked around the room to find our math problems on Wednesday and then we were able to test on them on Thursday. We did great!

We read a story about a girl named Jo this week. In this story we found many different cause - effect relationships and were even able to come up with our own. Jo practiced on a 16foot high hoop so she was able to dunk the ball on the 10 foot high hoop. The boys thought she was a boy because she was wearing a baseball hat. Jo was a good ball player so the boys invited her back to play with them again. The boys gave her the nickname Jumpin' Jo because she could jump so high.

We finally finished our science lesson on Engineering. We worked so hard and creatively on our boats. On Tuesday we were able to finish them and on Thursday we were able to test/refine/finalize the boats. We are happy to say we were successful in getting all our goats across the river without having to use the bridge. We also had loads of fun working on this and actually being able to test them in a pool of water. Science ROCKS!!

I would like to announce that everyone in class was able to raise their goal for the Work-a-thon!!! SUPER!! And CONGRATULATIONS to Zach for raising the most in our class. Zach will be riding the fire truck to Dairy Queen on Wednesday for lunch. Way to go Zach!
